Foreword from IPA

A large part of the publishing industry is built on stories and taking those stories from author to reader.

But how do we tell our own story as a sector?

Data about sector evolutions are certainly one important part and when I began my Presidency of IPA in January 2023, I wanted to make data a core priority. This report marks the culmination of many hours of intense work and I am delighted to see it completed in record time.

How we got here has its own story and characters.

We have been privileged to work with the World Intellectual Property Organization since 2017 on Global Publishing Statistics. That project has grown to include cooperation with the Federation of European Publishers, CERLALC and others. I share my continued gratitude to the WIPO team for sticking with this initiative, which has presented its own challenges, and has produced 5 years of valuable reports on our sector. That work has shown us where IPA’s members and national statistics offices have data and where they don’t.

As I became IPA President, Pranav Gupta, IPA Executive Committee member and publisher from India, became the chair of the newly created IPA Data and Statistics Committee having already done great work in bringing the Indian book sector together to produce its own data in 2022.

The final piece in this jigsaw was to work with Nielsen BookData and use their extensive network and experience of the sector to fill the gaps.

My gratitude goes to all those IPA members who shared data with WIPO, Nielsen or both.

My congratulations to Pranav for his leadership of this Committee and to Vikrant Mathur and his team at Nielsen BookData for bringing all of this data together.

With data points from over 70 countries, this report is one of the most comprehensive publishing industry reports ever published.

But it isn’t the story of our sector yet. Just a snapshot. Windows into the state of different markets at a particular point in time. Let this be the starting point for publishers, publishers’ associations, and national governments to start measuring this amazing, successful, global creative industry and telling the story of our ongoing contribution to the world’s cultures, economies, education systems and more.

Karine Pansa, President
International Publishers Association

EXECUTIVE SUMMARY
Executive Summary

Nielsen BookData and the International Publishers Association (IPA) collaborated at the beginning of 2023 to navigate the evolving landscape of publishing within the IPA member countries. The publishing landscape continues to undergo profound transformations, impacting publishers, content creators and consumers alike, and a data-driven approach is required to address the rapidly changing dynamics.

The Nielsen BookData and IPA Report is a collaborative project providing valuable insights into the global publishing industry. The collected data cover industry structures, demographics, digital inclusion, school and higher education enrolments, and public policy. The data will inform the work of publishing professionals and policy-makers and enable comparisons to be drawn between countries and regions of the world.

The study will enable publishing houses to assess market prospects in different regions and countries. For example, school and children’s publishers can see the age distribution of the national populations, alongside data on the number of schools and enrolled students, and how the schools are operated, whether state or privately run. Publishers can tailor their content to meet the educational needs of each country according to the domestic infrastructure. There is information about imports and exports by country, revealing the leading sources of book imports and top countries for export. Analysis of import and export data identifies receptive target markets and helps publishers to refine their international distribution strategies. This is further aided by the data in the report on prominent book publishers and retailers for each country. Levels of digital connectivity will inform decisions about print and digital publishing, and data on the penetration of social media are highly relevant to marketing campaigns. Academics studying the industry can draw on the rich data in the report when developing research programmes into the key drivers influencing reading habits and book consumption.

Books remain an important part of the knowledge economy as reflected by the supportive policy regimes in many countries. Policy-makers and trade bodies will find the data valuable, for example, for comparing tax regimes across countries and regions. Information in the study on fixed book pricing and equivalent policies should inform the debate in this area. Sharing information about the regulatory frameworks for publishing in each country will help publishers navigate legal requirements and protect intellectual property rights.

The report is divided by region using the United Nations (UN) definitions. Countries are grouped geographically into six major areas: Africa, Asia, Europe, Latin America and the Caribbean, North America, and Oceania. There are summaries for each region and in-depth data across the 76 IPA member countries.

The population within the 76 member countries totals around 80% of the world’s population. The survey included the two most populous nations in the world, India and China, each with a population of 1.4 billion, alongside smaller nations such as Armenia, Mauritania and Slovenia. There is coverage of all the major international book markets such as the United States of America, China, Japan, India, Germany and the United Kingdom.
1. Publishing Industry

The survey gathered data on the number of books registered in 2022 in each country. Overall, the country issuing the highest number of ISBNs was the United States, with over 3 m ISBNs registered. The table below highlights leading countries for ISBNs issued by region.

A comparative measure between national industries is new title production per capita of the population. Some countries with smaller populations, such as Iceland, Singapore and Slovenia, score highly by this measure. For the regions of Africa, Asia, Europe, Latin American and the Caribbean, the following are the countries with the highest ratio by this measure:

Africa: Tunisia, Nigeria, Ghana
Asia: Japan, Republic of Korea, Singapore
Europe: Slovenia, Iceland, Netherland
Latin America and the Caribbean: Brazil, Argentina, Chile

Fixed Book Price Regimes

The data are incomplete in this area but there is evidence of Fixed Book Price regimes or an equivalent policy in four of the regions: Africa, Asia, Europe, Latin American and the Caribbean.

2. School Education

Data were collected by country on both the number of schools and school enrollments. The data set is incomplete and secondary research was carried out where possible. There is also data on how schools are run – whether by the government or privately. The data on school enrollments as a percentage of the total population reveals the young population in Africa. The UN estimates that 70% of sub-Saharan Africa is under the age of 30. The school population in Africa is 20% of the total population, compared to a figure of 14% in Europe. The table below gives the percentages for each region.
The countries with the highest proportion of their total population in school education are Kenya, Côte d'Ivoire, Libya, South Africa and Morocco. This reflects a younger demographic in the national populations.

Figures on school enrollments for Asia are incomplete, but the countries with the highest school populations are India, Indonesia, the Philippines, Pakistan, and Japan. India has the highest number of schools in the Asia region, with 1.4 m - 77% of schools are managed by the government and 23% are run privately. Indonesia is ranked second followed by Pakistan. Indonesia reported around 400,000 schools in operation, with the government running 63% of them and 37% run privately. Pakistan has over 140,000 schools: 87% of the schools are run by the government, with the other 13% privately operated.

The countries with the highest proportion of their population in school education are Israel, Philippines, Nepal, Lebanon and Sri Lanka. This reflects the younger demographic in the national populations.

In Europe, Russian Federation had 44,000 schools; followed by the United Kingdom, which has more than 32,000 schools. According to the secondary research by Nielsen BookData, France has 57,000 schools operating in the country.

The countries with the highest proportion of their total population in school education are Ireland, France, Sweden, Norway and Belgium.

Data on school enrollments are incomplete for the region of Latin America and the Caribbean. According to the data collected from the publishing associations, Mexico has more than 250,000 schools in the country: 85% of schools are managed by the government and 15% are run privately. Second position goes to Brazil with more than 178,000 schools - 77% of schools are managed by the government and 23% are privately owned. Colombia has more than 56,000 schools with 81% managed by the government and 19% privately owned.

The countries with the highest proportion of their total population in school education are Brazil, Guatemala, Panama, Columbia and Chile.

In the region of Northern America, the United States has 130,000 schools and enrollments of 53.9 m students. In Canada, there are 84,000 schools and enrolments of 5.7 m students. Regarding the region of Oceania, Australia has approximately 10,000 schools and enrollments of 4 million. In New Zealand, there are 2,500 schools and enrollments of over 800,000 students.

### 3. Higher Education

Data were collected by country on both the number of higher education institutions and the number of students enrolled. There is also data on how higher education institutions are run – whether by the government or privately.
The data on enrollments in higher education as a percentage of the total population reveals higher rates in Northern America and Europe. The table below shows the percentage for each region.

**Table: Higher Education Enrollments as a percentage of total population by region**

<table>
<thead>
<tr>

<tr>
<td>Oceania</td>
<td>5</td>
</tr>
</tbody>
</table>

Data are only available for six of the IPA member countries in the Africa region. Kenya has the highest number of higher education institutions. There are 2,550 higher education institutions, and 94% are government run, and 6% are privately owned. Côte d’Ivoire ranks second on the list with 614 higher education institutions: 98% are privately held, with the government controlling the other 2%. Nigeria has 492 higher education institutions, with 50% run by each of the government and the private sector.

The countries with the highest percentage of their population in higher education are South Africa, Egypt and Kenya. The five countries in Asia with the largest number of students in higher education are India, Indonesia, Philippines, Republic of Korea, and Japan. No figure was recorded for China, but the number is estimated to be around 45 m students.

India has the highest number of higher education institutions (over 55,000). Indonesia ranks second with 4,004 higher education institutions – provision is largely offered by the private sector, and 96% of higher education institutions are privately run. Pakistan has 3,223 higher education institutions, with 55% of these public institutions.

The countries with the highest percentage of the population in higher education are Republic of Korea, Singapore, Lebanon, Israel and Philippines.

In Europe, the Russian Federation reported 1,247 higher education institutions operating in the country; and the United Kingdom 590. Secondary data suggested that there are 75 universities in Spain and 71 universities in France. The countries with the highest proportion of their population in higher education are Greece, Netherlands and Norway.

Regarding higher education in the region of Latin America and the Caribbean, Mexico reported 8,539 higher education institutions in the country. Of these 65% are privately held, with the government controlling the other 35%. Guatemala has 5,006 higher education institutions: 81% are privately held, with the government controlling the other 19%. Next is Brazil with 2,574 higher education institutions, with 88% operated by private players. The countries with the highest percentage of the population in higher education are Peru, Brazil and Columbia.

In the region of Northern America, the United States has nearly 6,000 higher education institutions with an enrollment of 21.1 m students. In Canada, student enrollments are around 2.1 m. In Oceania Australia has 200 higher education institutions with an enrolment of 1.5 m students; and New Zealand has 8 universities with around 150,000 students enrolled.

### 4. Imports and Exports

The survey revealed the top sources of book imports for each country, and the leading export markets. The answers were aggregated to identify the countries that received the most mentions within each region. There is a high frequency observed for large publishing markets such as the United States and the.
Responses to the survey around the importation of books highlighted 17 countries as the origin of book imports in the Africa region. The three countries most frequently mentioned were India, United Kingdom and United States. It is suggested that the frequency of mentions for India could reflect the printing of books there. In terms of book exports, a plurality of countries is to be found: 27 countries were highlighted with Kenya and Tanzania receiving the most mentions.

Responses to the survey in Asia around the importation of books highlighted 14 countries as the origin of book imports. The three countries most frequently mentioned were the United Kingdom, United States and China. In terms of book exports, a large number of countries were mentioned (29): the four countries with the most mentions were Germany, United Staes, United Kingdom and France.

Responses to the survey in Europe around the importation of books highlighted 23 countries for the sourcing of books, with the top three, recording the most mentions, the United Kingdom, United States and Germany. In terms of book exports, a large number of countries were mentioned (29): the four countries with the most mentions were Germany, United Staes, United Kingdom and France.

Responses to the survey in the region of Latin America and the Caribbean around the importation of books highlighted 8 countries for the sourcing of books, with the top three, recording the most mentions, Spain, United States and China. In terms of book exports, 13 countries were mentioned in the responses. The top four, with the most mentions, were United States, El Salvado, Guatemala and Peru.

For Canada, in the region of Northern America, the United States and France are the two main countries for sourcing book imports, and those two countries are also the leading export markets.

In Oceania, key countries for the import of books to Australia are the United States and United Kingdom; these are also important export destinations. For New Zealand, Australia and the United States are the main export markets as well as the main sources of imported books.

5. Digital Inclusion

The research collected data on mobile phone usage, internet access, and social media penetration. The figures for mobile phone usage often exceeded 100% of the population, revealing multi-device connectivity. The highest rate of mobile usage is found in Europe, and the highest rate for internet usage is in Northern America. Dafa were also collected for social media usage in each country. The greatest variance in social media usage is found in the region of Africa, with high rates in Europe, Northern America and Oceania.

The rates of mobile usage are high across the region of Africa. Figures exceeding 100% can be seen in 7 countries suggesting high rates of multi-device ownership. The lowest figure given is 53% in Mozambique. The proportion of internet users reaches 70% or greater in 5 countries. The rate of social media usage ranges from 6% in Uganda and 9% in Mozambique to 91% in Libya and 93% in South Africa.

The rates of mobile usage are high across Asia with the lowest figure being 69% in Lebanon. Figures exceeding 100% can be seen in 11 countries suggesting high rates of multi-device connections. The proportion of internet users reaches over 90% of the population in 8 of the IPA member countries surveyed. The rate of social media usage ranges from 31% in Pakistan and 68% in China and 33% in India to 91% in Lebanon and over 100% in the UAE.

In Europe, the rates of mobile usage are high across the region with an average mobile subscriber score of 124%, suggesting multi-device usage is common. Internet usage is also high across the region with the lowest scores to be found in Albania and Ukraine (both 72%). Social media usage reaches high levels in Iceland (96%), the Netherlands (91%) and Sweden (91%).

The rates of mobile usage are high across the region of Latin America and the Caribbean with the lowest figure being 77% in Venezuela. Figures exceeding 100% are seen in 8 countries suggesting high rates of multi-device connections. The proportion of internet users is above 50% in all countries with rates of 92% in Chile and 90% in Brazil. The rates of social media usage range from 50% in Jamaica to 93% in Chile.

The rates of usage across mobile, internet and social media are high in the regions of Northern America and Oceania.
Introduction

Nielsen BookData and the International Publisher Association (IPA) collaborated at the beginning of 2023 to navigate the evolving landscape of publishing within the IPA member countries. In today’s age, the publishing landscape has undergone profound transformations, impacting publishers, content creators and consumers alike, and a data-driven approach is required to address these rapidly changing dynamics.

This report aims to shed light on the IPA member countries’ key parameters as outlined below:

1. Educational Infrastructure: Assessing the state of the education infrastructure, including the number of schools and colleges in order to help publishers tailor their content to meet the educational needs of each country.

2. Publisher and Retailer Landscape: Assessing the prominent book publishers and retailers by country, as these are integral to a respective country’s creative and intellectual economy.

3. Export and Import Opportunities: Analyzing import and export data helps publishers identify markets with demand for books, facilitating international distribution strategies.

4. Regulatory Framework: Sharing information about the regulatory frameworks for publishing in each country in order to help the publishers navigate legal requirements and protect intellectual property rights.

5. Digital Penetration: Providing information about the digital penetration of IPA member countries, as this has become a critical factor in today’s interconnected world.

The Nielsen BookData and IPA Report is a collaborative project providing valuable insights into the publishing industry’s ever-evolving landscape. By employing rigorous data collection and analysis methodologies, we aim to empower industry stakeholders with the knowledge needed to adapt and thrive in this dynamic environment.
Research Methodology

The study includes the combination of primary and desk research. The 76 IPA member counties were classified into the following regions: Africa, Asia, Europe, Latin America & Caribbean, North America and Oceania.

The data collection methodology for each of the regions are mentioned below:

<table>
<thead>
<tr>

</tbody>
</table>

The World Intellectual Property Organisation (WIPO) and the Federation of European Publishers (FEP) undertook data surveys on the publishing sector, and utmost care was taken to avoid duplicating their work.

Unless otherwise indicated the data sourced in this report was collected from the respective country’s publisher associations. If secondary data was used, we have cited the appropriate sources. Country profiles only include information for which data (from local associations or secondary sources) was available.

Data on the number of publishers was provided by publishers’ association and ISBN agencies. ISBN agency data tends to give much higher numbers of publishers as it includes self-publishers and possibly publishers who are no longer active. Where data was provided by both the local publishers’ association and the local ISBN agency then we have used the publisher association data.

Note: The regions included in the report adhere to UN guidelines
AFRICA REGION
Summary

Fifteen (15) IPA member countries in the Africa region were surveyed by Nielsen BookData for this study. The total population of the countries is over 700 m, and Nigeria is the most populous nation with nearly 220 m people. Literacy rates vary from lower rates in Senegal (56%) and Sudan (61%), reaching 90% for Côte d’Ivoire and 95% for South Africa. Data on the age range of the countries in the study confirm that the region has one the youngest population in the world.

The Publishing Industry

The data on publishing houses are sparse for this region with figures for ISBNs registred were only available for 4 countries and the count of publishing houses were available for 8 countries. The 4 countries with a return for the number of titles registred are Nigeria, Tunisia, Ghana and Kenya.

Across the Africa region, much book publishing is concentrated in the area of educational textbooks. Nigeria has the largest publishing market, mostly in education books, and books are produced in local African languages as well as in English. The main indigenous languages include Yoruba, Hausa and Igbo. Books in Tunisia are published in both French and Arabic.

A comparative measure between national industries is new title production per capita of the population. This survey is limited in data for title production, but the first three countries by this measure are Tunisia, Nigeria and Ghana.

Fixed Book Price Regimes

There is fixed book pricing or equivalent in two of the countries in the Africa region, Côte d’Ivoire and Kenya.

School Education

Figures on school enrollments are incomplete but of the countries with data returned, the highest school populations are Nigeria, Egypt and Kenya. Nigeria has the highest number of schools in the region, with more than 144,000 in number, 50% are managed by the government and 50% run privately. Kenya reported 31,000 schools, with the government running 77% schools, and 23% run privately. In South Africa there are approximately 25,000 schools - 91% of the schools are run by the government.

The countries with the highest proportion of their total population in school education are Kenya, Côte d’Ivoire, Libya, South Africa and Morocco. This reflects a younger demographic in the population as a whole.

Imports and Exports

Responses to the survey around the importation of books highlighted 17 countries as the origin of book imports in the Africa region. The three countries most frequently mentioned were India, United Kingdom and United States. In terms of book exports, a plurality of countries is to be found: 27 countries were highlighted with Kenya and Tanzania receiving the highest number of mentions.

Digital Inclusion

The rates of mobile usage are high across the region with the lowest figure 53% in Mozambique. Figures exceeding 100 per cent can be seen in 7 countries suggesting high rates of multi-device ownership. The proportion of internet users reaches 70 per cent or over in 5 countries. The rate of social media usage ranges from 6% in Uganda and 9% in Mozambique to 91% in Libya and 93% in South Africa.

Summary

This region takes in twenty-three (23) IPA members and the geographical scope extends from Jordan to Japan. The total population of the region is 4.2 bn, and India and China are the two most populous nations in the world with 1.4 bn people in each country. Literacy rates vary from lower rates in Pakistan (58%) and Nepal (71%) reaching high figures (over 90%) in sixteen (16) of the IPA member countries in Asia.

The Publishing Industry

Data on ISBNs registered are available for 14 out of the 23 countries surveyed. The top five countries are Japan, Republic of Korea, India, Indonesia and Türkiye. This set of countries also has the largest number of publishing houses.

The Japanese market has largest number of ISBNs registered and Japanese culture is highly popular around the world including the success of manga. Korea is a flourishing publishing market, and the influence of Korean culture has also spread around the world from K-pop to Webtoons.

India is the world’s second largest book market for English language content. A large part of the market is books for schools and higher education. The country’s young population is driving demand for education and skills. Global publishers rely heavily on the skills of publishing services companies in India. Books are published in a variety of languages other than English, including in Hindi, Bengali and Telugu.

The figure given for the number of publishers in China, another large publishing market, reflects the restructuring of publishing by the government to create around 580 state publishing houses. No figure has been received for this study, but it is estimated that new ISBNs registered in China exceeds 200,000. The trade market displays a strong interest in self-help titles.

<table>

A comparative measure between national industries is new title production per capita of the population. The first five countries by this measure are Japan, Republic of Korea, Singapore, Türkiye and Jordan.

Fixed Book Pricing Regimes

There is fixed book pricing or equivalent in 4 of the IPA member countries: China, Japan, Nepal and the Republic of Korea.

School Education

Figures on school enrolments are incomplete but the countries with the highest school populations are India, Indonesia, the Philippines, Pakistan, and Japan. India has the highest number of schools in the Asia region, with 1.4 million - 77% of schools are managed by the government and 23% are run privately. Indonesia is ranked second followed by Pakistan. Indonesia reported around 400,000 schools in operation, with the government running 63% of them and 37% run privately. Pakistan has over 140,000 schools: 87% of the schools are run by the government, with the other 13% operated privately.

The countries with the highest proportion of their population in school education are Israel, Philippines, Nepal, Lebanon and Sri Lanka. This reflects the younger demographic in the national populations.
Higher Education

Turning to the numbers in higher education, the five countries with the largest number of students in higher education are India, Indonesia, Philippines, Republic of Korea, and Japan. No figure is provided for China, but the number is estimated to be around 45 m students.

India has the highest number of higher education institutions (over 55,000). Indonesia ranks second with 4,004 higher education institutions – provision is largely offered by the private sector, and 96% of higher education institutions are privately run. Pakistan has 3,223 higher education institutions, with 55% of these public institutions.

The countries with the highest percentage of the population in higher education are the Republic of Korea, Singapore, Lebanon, Israel, and the Philippines.

Imports and Exports

Responses to the survey around the importation of books highlighted 14 countries as the origin of book imports. The three countries most frequently mentioned were the United Kingdom, United States and China. In terms of book exports, 20 countries were highlighted with the ones most often mentioned the United States, Saudi Arabia, China and the United Arab Emirates.

Digital Inclusion

The rates of mobile usage are high across the region with the lowest figure being 69% in Lebanon. Figures exceeding 100% can be seen in 11 countries suggesting high rates of multi-device connections. The proportion of internet users reaches over 90% of the population in 8 of the IPA member countries surveyed. The rate of social media usage ranges from 31% in Pakistan and 33% in China and India to 91% in Lebanon and over 100% in the UAE.
Demographic Profiling: ARMENIA

ARMENIA

In 2022, the population of Armenia stood at around 2.8 m.
The official language is Armenian.

In 2022, its population declined by 0.4% and its share of the world’s population was 0.03%.

It has a literacy rate of 99.8%.

Digital Adoption: ARMENIA

Digital Uptake

In the digital landscape of Armenia as of 2022, mobile subscribers stood at 131% of the total population, internet users at 67%, and social media users at 69%.

It’s a common global trend for individuals to utilize multiple mobile connections, sometimes leading to mobile connection figures surpassing the total population.

Additionally, it’s worth emphasizing that social media statistics may not reflect unique individuals.

SINGAPORE
Demographic Profiling: SINGAPORE

In 2022, the population of Singapore stood at around 5.6 m. The official languages are English, Malay, Mandarin, Chinese and Tamil.

One notable demographic trend in Singapore is its relatively low total fertility rate, which averages at 1.12 children born per woman.

**Digital Adoption: SINGAPORE**

In 2021, Singapore showcased a significant embrace of digital platforms, with extensive use of mobile devices, the internet, and social media.

The rate of mobile device usage surpassed 100%, suggesting a trend of multi-device ownership.

The proportion of internet users was substantial, encompassing 92% of the populace. Furthermore, the prevalence of social media was notable, with nearly 90% of Singapore’s population actively engaging on these platforms.

These figures underscore Singapore’s advanced technological landscape and the adaptability of its citizens to digital mediums.
Education Infrastructure: SINGAPORE

The data encompasses the overall number of schools and higher education institutions categorized by management type. Singapore has a total of 360 schools and 26 higher education institutes. 96% of schools are government, while 4% are private. The higher education sector consists of 73% privately managed institutes and 23% are government owned.

EUROPE REGION
Summary

In the European region, Nielsen BookData has collected data through Federation of European publishers (FEP). As a result, the Nielsen BookData questionnaire was not directly sent to the IPA members based in European countries. Desk research from Nielsen BookData was also important in locating data available in the public domain for European markets. The total population of the countries is around 620 m, and the Russian Federation is the most populous nation with 143 m people.

The Publishing Industry

Data on ISBNs registered are available for 17 countries of the 23 countries surveyed. The countries with the highest ISBNs registered are Germany, United Kingdom, Italy, Spain, and the Netherlands. Data around the number of publishing houses are available for 18 countries, and the largest figure is for the Netherlands which has nearly 75,000 publishers.

Germany is Europe’s largest book market in terms of revenue and approaching 10% of all translations worldwide originated from German books. The United Kingdom has the advantage of English being a lingua franca around the world and it exports both through book sales and translations. The proportion of the population aged 0-14 years is 12%, the lowest figure amongst the countries surveyed in the region.

A comparative measure between national industries is new title production per capita of the population. The first five countries by this measure are Slovenia, Iceland, Sweden, Netherlands and Germany.

Fixed Book Price Regimes

There was an incomplete response in this area, but fixed book pricing or an equivalent policy is in place in several European countries including France and Germany.

School Education

According to the data collected by Nielsen BookData, France has 57,000 schools operating in the country. Russian Federation had 44,000 schools; followed by the United Kingdom, which has more than 32,000 schools.

The countries with the highest proportion of their total population in school education are Ireland, France, Sweden, Norway, and Belgium.

Imports and Exports
Responses to the survey around the book importation highlighted the role of 23 countries. The top 3 countries for the sourcing of books were the United Kingdom, United States and Germany. These were ranked according to the recording of mentions. In terms of book exports, 29 countries were mentioned: the top 4 with the most mentions were Germany, United States, United Kingdom and France.

Digital Inclusion
The rates of mobile usage are high across the region with an average mobile subscriber score of 124%, suggesting multi-device usage is common. Internet usage is also high across the regions with the lowest scores to be found in Albania and Ukraine (both 72%). Social media usage reached high levels in Iceland (96%), the Netherlands (91%) and Sweden (91%).
Demographic Profiling: ALBANIA

In 2022, the population of Albania stood at around 2.8 m. The official language is Albanian. In 2022, its population declined by 1.3% and its share of the world’s population was 0.03%. It has a literacy rate of 98.4%.

Digital Adoption: ALBANIA

In the digital landscape of Albania as of 2022, mobile subscribers stood at 113% of the total population, internet users at 72%, and social media users at 65%.

It’s a common global trend for individuals to utilize multiple mobile connections, sometimes leading to mobile connection figures surpassing the total population.

Additionally, it’s worth emphasizing that social media statistics may not reflect unique individuals.

LATIN AMERICA AND CARIBBEAN REGION
Summary

Eleven (11) IPA member countries in the region of Latin America and the Caribbean were surveyed for this study. The total population of the countries is around 550 m, and Brazil is the most populous nation with 215 m people. Literacy rates are high with the lowest rate recorded being 83% in Guatemala.

The Publishing Industry

Data on ISBNs registered are available for 9 out of the 11 countries surveyed. The countries with the highest ISBNs registered are Brazil, Argentina, Mexico, Colombia and Peru. Data around the number of publishing houses are only available for 6 countries, and Argentina has the highest number with nearly 7,000 publishers.

Latin America is known as a large Spanish-language market whilst Brazil is a Portuguese-speaking country. The share of digital in Brazil is around 6% in the market as compared to 15% in Colombia, where there are digital platforms in education. Mexico remains a print market with digital only taking a 4% share. Argentina has a strong tradition around literature, and it has been said that Buenos Aires has the highest concentration of bookstores per capita of anywhere in the world. There are over 1,600 bookstores across the whole country. Mexico is the home of the Guadalajara International Book Fair, the largest Spanish language book fair in the world, which attracts over 800,000 visitors each year.

A comparative measure between national industries is new title production per capita of the population. The first 3 countries by this measure are Brazil, Argentina, Chile.

Fixed Book Price Regimes

There is fixed book pricing regimes or equivalent recorded in one country, Mexico.

School Education

Figures on school enrollments are incomplete for the region. According to the data collected from the publishing associations, Mexico has more than 250,000 schools in the country: 85% of schools are managed by the government and 15% are run privately. Second position goes to Brazil with more than 178,000 schools - 77% of schools are managed by the government and 23% are private owned. Colombia has more than 56,000 schools with 81% managed by the government and 19% privately owned.

The countries with the highest proportion of their total population in school education are Brazil, Guatemala, Panama, Colombia and Chile. There is a younger population particularly evident in Guatemala and Panama.

NORTH AMERICA REGION
Summary

This region is made up of the book markets of United States and Canada. Their combined population is over 370 m people.

The Publishing Industry

The United States is the world’s largest book market. The largest trade publishers, Penguin Random House (PRH), Hachette, HarperCollins, Macmillan and Simon & Schuster are known as the Big Five. In 2023, Simon & Schuster was bought by private equity firm KKR following the blocking of a takeover by PRH. Previously the chain store Barnes & Noble had been bought by private equity, Elliott Management, which also owns Waterstones in the UK. Digital sales are around 20% of the market. Frontlist sales take up around one-third of book sales, and the rise of BookTok has encouraged backlist sales.

In Canada, there are two official languages, English and French, and the number of French speakers approaches 25% of the population. There is domestic publishing in both languages. Canada was guest of honour at the Frankfurt Book Fair across two years (due to COVID), 2020 and 2021, uniting the country’s English and French language publishing communities in a shared international project.

International publishers with a presence in the country include HarperCollins, Penguin Random House and Savvas Learning Company. Local publishers include Annick Press, Douglas & McIntyre, Éditions du Boréal and Group Homme. Remaining controversial is the Copyright Act of 2012 which includes the education sector under fair dealing, leading to free copying by educational institutions.

Imports and Exports
For Canada, the United States and France are the two main countries for sourcing books, and those two countries are also the leading export markets.

Digital Inclusion
The rates of mobile usage are high across the region with United States has 97% of mobile subscribers, while in Canada it stood at 102%, suggesting multi-device usage is common. Internet usage is also high across the region with Canada is having the highest internet users in the region, covering 97% of the population, while United States stood at 93%. Social media usage in Canada (87%) was higher compared to United States (70%).
CANADA
### Demographic Profiling: CANADA

**In 2022, the population of Canada stood at around 38.9 m.**

**Taxes on Books: United States of America**

In United States of America, sales tax varies by state. Depending on the state, sales tax could vary between 0% to 7.25% on print, audio and ebooks.
Summary

This region encompasses the book markets of Australia and New Zealand, both English-speaking markets. The combined population of the two countries is over 30 m people.

The Publishing Industry

In Australia there were over 31,000 new titles published in 2022. Large international companies such as Hachette and Penguin Random House have operations in the country, alongside domestic companies such as Allen & Unwin and Hardie Grant. Home-grown titles are significant in the market and independent booksellers still have a strong presence.

The rules around parallel importation favour local publishers who take on international titles: bulk orders can only be made through local companies, and not ordered from overseas.

The figure of over 200 publishers in Australia compares to the total of 80 for New Zealand. Again, some of the large international publishing groups have offices in the country, and Penguin Random House New Zealand has the largest overall market share. Children’s books are a significant part of the trade market. The country has a strong reading culture and 30% of the population are active users of the public library network. In 2021 it was estimated that digital revenues represent 8 per cent of the market.

About International Publishers Association (IPA)

The International Publishers Association (IPA) is the world’s largest federation of publishers associations with 92 members in 76 countries. Established in 1896, the IPA is an industry body with a human rights mandate. The IPA’s mission is to promote and protect publishing and to raise awareness of publishing as a force for economic, cultural and social development. Working in cooperation with the World Intellectual Property Organization (WIPO) and numerous international NGOs, the IPA champions the interests of book and journal publishing at national and supranational level. Internationally, the IPA actively opposes censorship and promotes copyright, freedom to publish (including through the IPA Prix Voltaire), and literacy.
